

**Information for producers**

An NCS product certification is the first choice when you want to communicate your quality claim **without restrictive membership in a professional association.**

The referring to the NCS standard including the possibility to use the label costs **€ 50 per product per year** plus certification fee. You lower your certification costs as there is no membership fee to pay.

The assessment takes place on annual on-site audit. The control and certification bodies authorised by NCS operate according to ISO 17065.

The NCS label is an **internationally registered brand** and can be used worldwide.

**Product certification for natural cosmetics**

Product certification for ecological non-food products

Company certification for sustainable enterprises

Consulting and knowledge transfer for product- and company standards with a focus on sustainability

Natural cosmetics for humans, animals and the environment

**NEW: Declaration of vegan and organic quality**

## NCS – for those who love natural cosmetics

Our skin lives and breathes. It is the most important boundary between our environment and our bodies. Natural care is not only balm for the body, it is also advantageous for the environment and animal welfare.

Understandably more and more people opt for natural care. In this context, ethical issues will play an increasingly important role.

The NCS product standard (Natural Cosmetics Standard) labels natural cosmetics for man and animal. It identifies products such as shampoo, lip balms or bath oils.

NCS Products bearing the NCS label undergo in-depth testing and fulfil the highest quality requirements. Products which bear the NCS label consist of natural original materials, preferably in an organic quality.

The emphasis on ORGANIC QUALITY or VEGAN is possible. To meet the highest consumer expectations, producers can choose a combination of both claims.

## NCS – natural cosmetics for humans, animals and the environment

- No microplastic
- No genetic manipulation
- No parabens, silicones, PEG's or ftalates
- No animal testing
- No radiation
- Only natural fragrances and plant based solvents
- Certified palm oil (minimum RSPO)
- Packaging is thought through, can be recycled or reused
- A natural cosmetic standard which is based on sustainability

## NCS – one seal, many options

The opportunity to distinguish the wide range of natural products by one basic symbol, makes the NCS unique.
